

# BM-5/5D Features & Benefits

Feature	Benefit	Customer Value
Smaller Capacity	Better stability at the lower end of the SHS weigh cell yields faster performance & reliability	Increase productivity in already challenging micro-weighing environments & sample types
Built-in Fan-less Ionizer Anti-static Glass	Mitigate the risk of drifting results due to static interferences on day 1	Reduce uncertainty Increase accuracy & precision Save sample & labor cost Ensure safety & reduce biohazard waste cost
Modifiable Inter-locking door configurations S.S. Draft rings & enclosures AD-1676 enclose is standard	Mitigate the risk with draft interference	Reduce uncertainty Increase accuracy & precision Avoid cross contamination
Data Integrity	Be compliant with GLP traceable reports, Data transfer and security to meet 21 CFR part 11 Minium sample weight requirements found in USP41	Avoid expensive non compliance Ensure peace of mind with S.O.P's and FDA/USP regulatory requirements
Large Draft-shield Touch-free IR sensor & foot switch options	Large workspace customize with interlocking doors Add IR sensor allows automatic opening/closing of the door by waving hand in front of sensor alternatively use a footswitch to leave hands completely free.	Increase productivity with seamless workflow Reduce air interferences Avoid cross contamination weigh direct into volumetric vessel

## ELIMINATE STATIC on DAY 1

The New BM-5 Microgram Balance  
with Quick Ion® Technology
